**PRESS RELEASE – IBC 2006**

**September 2006**

**Stand : 7-130**

## **New for IBC 2006**

### **Lightworks VIT**

Lightworks VIT is a multi-channel Ingest facility which provides efficient Ingest without tying-up valuable Edit Suites.

With support for up to four simultaneous ingest channels and a full toolset for optimised ingest, Lightworks VIT provides a cost effective solution when time is important or when Edit Suites can be better utilised for Editing rather than Ingest.

Supporting SD and HD formats and a range of codecs, Lightworks VIT can operate in many different applications. Media ingested can be utilised in most popular current edit systems and operations and metadata interchange have been optimised for use with Lightworks Alacrity.

Those familiar with the previous Lightworks VIP product will see the same fast operation and simplified workflow but tailored to today's multi-format world.

#### **About Gee Broadcast Systems Ltd**

Gee Broadcast Systems has been supplying the UK and International Broadcast market for over 19 years. Gee Broadcast's video servers and systems storage solutions enable customers to maximise their programming capability by running their broadcast operations more efficiently and cost-effectively. Based on a broad experience of the broadcast industry and customer input and feedback, the Geevs range of customisable servers delivers a dramatic increase in work-flow and a real return on investment. Geevs Servers come with a range of customer service, support and training options.
